

PRINTING INSTRUCTIONS FOR KATE BURGNER CREATIVE PARTY PRINTABLES

Thank you so much for purchasing a printable from my line of planners and party supplies. All of the files have been formatted to print on letter-sized paper (8.5" x 11"), and the artwork is sized to work with the printing margins on most home printers. Certain elements, such as trim lines, may have been intentionally placed outside the margins, but these are not intrinsic to the design and function of the piece. If you are printing a half-page planner or a set of pattern pages, those do have pattern to the edge intentionally so you can get as much patterned area as your printer will allow.

Because the printing margins have been built into the design, it's ideal to print without page scaling for evenly-spaced results. This control will be found in the Print dialogue box of Adobe Reader or Acrobat, depending on what program you use.

It may look a little differently on different versions of the program, but look for words such as "size," "fit," and "page scaling." You'll want to make sure the options are set to indicate that the page is not scaled down (so if you set a custom scale to 100%, you should be printing at the right size). Please refer to the above pictures and explore your program to make sure you're printing the artwork at the correct size without clipping it!

Thanks and enjoy!
